PROFESSIONAL SUMMARY

IT Support Engineer with approximately 2 years of combined experience in field support, system troubleshooting and network connectivity, including client-site support for the Indian Navy through Techfruit Solution. Skilled in Windows and Linux troubleshooting, hardware and peripheral support, TCP/IP, IPv4 addressing, DNS, DHCP and LAN diagnostics. Red Hat Certified System Administrator (RHCSA) with practical RHEL administration knowledge and project experience building a PowerShell-based Windows diagnostics toolkit. Seeking IT Support Engineer, Desktop Support Engineer or Junior System Administrator opportunities in Dubai.

CORE TECHNICAL SKILLS

IT Support: Desktop and field support, hardware/software troubleshooting, Windows installation, driver installation, printer/scanner support, Microsoft Office and Outlook configuration, system maintenance and patch management

Windows Administration: Windows 10/11, Windows Server 2016, Active Directory fundamentals, user/group management, Group Policy fundamentals, network shares

Linux Administration: RHEL, Rocky Linux, BOSS Linux, user/group administration, sudo, file permissions and ownership, system services, cron, basic networking

Networking: TCP/IP, IPv4 addressing, subnetting, DNS, DHCP, LAN troubleshooting, static routing, VLAN fundamentals, ACL fundamentals, router/switch basics, modems, wireless access points, UTP/STP cabling and crimping

Tools: PowerShell, Cisco Packet Tracer, ping, tracert, ipconfig, nslookup, arp and netstat

PROFESSIONAL EXPERIENCE

IT Support (Field Support) **Mar 2026 – Oct 2026**
Techfruit Solution | Client: Indian Navy *India*

- Provided field IT support for computer issues and network-connectivity problems at the client site.
- Configured static IPv4 addresses and DNS settings; performed LAN checks and connectivity troubleshooting.
- Assisted with router and switch configuration, basic VLAN-related tasks and IP connectivity testing.
- Supported modem and wireless access point installations, network cabling and UTP/STP cable crimping.
- Assisted with operating-system, driver and peripheral troubleshooting as part of routine IT support.

Dreams Computers (Aluva) **Jul 2025 – Jan 2026**
Occasional support for a local IT service provider *Kerala, India*

- Assisted on selected days with IT-related field tasks, modem/router installation and basic network-connectivity troubleshooting.
- Supported modem and wireless access point installations, network cabling and UTP/STP cable crimping.

PROFESSIONAL EXPERIENCE (CONTINUED)

IT Support (Field Support) **Apr 2024 – May 2025**
Techfruit Solution | Client: Indian Navy *India*

- Provided field IT support for computer issues and network-connectivity problems at the client site.
- Configured static IPv4 addresses and DNS settings; performed LAN checks and connectivity troubleshooting.
- Assisted with router and switch configuration, basic VLAN-related tasks and IP connectivity testing.
- Supported modem and wireless access point installations, network cabling and UTP/STP cable crimping.
- Assisted with operating-system, driver and peripheral troubleshooting as part of routine IT support.

SELECTED TECHNICAL PROJECTS

Windows IT Diagnostics Toolkit *PowerShell | Windows 10/11 | HTML | CSV | 2026*

- Developed a PowerShell toolkit to collect Windows system, disk, network and service diagnostic information.
- Exported results to HTML and CSV reports to make routine troubleshooting checks easier to review.

Red Hat Linux Administration Labs *RHEL | RHCSA Practical Labs*

- Practised user/group administration, sudo configuration, permissions, ownership, filesystem mounting and LVM tasks.
- Managed system services and practised scheduled jobs with cron, firewalld configuration and basic network settings.

Windows Server Active Directory Lab *Virtual Machine Lab*

- A guided, isolated virtual lab for domain controller setup, DNS, organizational units, user accounts, security groups and basic client verification.

Wireless Access Point and Local File-Sharing Setup *Home/Office Network Lab*

- Configured wireless SSID, security and IP settings; tested Wi-Fi connectivity and basic coverage issues.
- Tested local file sharing using modem/router USB storage where supported by the device and troubleshot client access.

CERTIFICATION

Red Hat Certified System Administrator (RHCSA) – Red Hat
Certification ID: 260-006-598
